PROFILE

I am an experienced Robotic Process Automation Developer and Business Process Analyst with 5 years of professional experience in automation. I have designed and built automation solutions that improved efficiency and reduced manual work for many teams.

I mainly use UiPath as my main RPA tool to create strong and scalable automation workflows.

I also focus on finding automation opportunities and making business processes faster and more productive.

EXPERIENCE

2018 - PRESENT	Automation Developer
Suncorp Automation	Design, develop, test, and deploy Robotic Process Automation (RPA) solutions using UiPath Studio, Orchestrator, and related automation tools to improve operational efficiency, accuracy, and scalability.
2017 - 2018	Policy Support Officer
Suncorp Policy Operations	Provide administrative and operational support in processing and maintaining insurance policies, including New Business, Renewals, Alterations, and Cancellations. Ensure accuracy, compliance, and timely completion of policy transactions in accordance with company standards and regulatory requirements.
2015 - 2017	General Administration Support
QBE	Ensure all customer and broker documentation is complete and compliant before submission for underwriting or processing. Communicate with brokers, underwriters, or customers to obtain missing information or clarify policy details. Manage shared mailboxes and distribute incoming correspondence to the right teams.
